Thank You/
Care Instruction Card

Jewellery Care Guide

Your jewellery is precious and deserves special care to retain its beauty and shine. Follow these simple tips to keep your pieces sparkling.

1. Avoid Contact with Chemicals: Keep your jewellery away from perfumes, lotions, cleaning products, and other harsh substances that can tarnish or damage it.
2. Remove Before Activities: Take off your jewellery before swimming, exercising, or engaging in household chores to prevent scratches, loss, or exposure to moisture.
3. Store Properly: Use a soft pouch, box, or separate compartments in your jewellery box to prevent pieces from rubbing against each other and causing damage.

Instagram Facebook Twitter YouTube

Experience and Service To Be Proud Of

We are a family-owned jeweller, with stores in Preston & Blackburn and have worked tirelessly for over 40 years to develop a reputation for quality, value and a standard of personal service that is rarely found these days. We are now one of the leading merchants in the north of the UK.

Quality

We're committed to great quality – whether that's in the products that we're offering or the service we provide. Without amazing quality, we wouldn't stand out – and neither would our jewellery.

Value

It's so important to ensure that not only are we offering a wide range of quality products, but we're providing them at affordable prices and finance plans, so everyone can have access to beautiful jewellery and watches.

Personal Service

We genuinely care deeply about our customers, especially as they tend to need our advice and expertise to make some of the most important decisions of their life. It's not uncommon to meet Peter Jackson in person, while shopping or speak to him on our website via online chat.

ABOUT US

At Principled Diamonds, we believe that the future of diamonds is "made, not mined". The benefits of lab-grown diamonds versus traditionally mined diamonds have never been more important than in recent years, offering an alternative that protects our planet, human rights, and your wallet, with no sacrifice in quality or beauty - Beautiful Diamonds That Don't Cost the Earth - But what exactly are the benefits of lab-grown diamonds, and why should you choose them over their mined counterparts?

Lab-grown diamonds also have the benefit of not being subject to the artificial scarcity and price-fixing that can be used in the mined diamond industry. As a result, they are considerably less expensive, while being exactly the same quality. Whether allowing you to buy a higher carat stone within your price range, or simply providing you with greater value for the size stone you want, the benefits of lab grown diamonds are clear.

We maintain our high standards across all aspects of our jewellery. We believe our dedication to principles, quality, and price help deliver the exceptional pieces that both you and the planet deserve.

Our History

Helping customers choose an exquisite piece of jewellery or a luxury watch from our collections here at John Pass Jewellers is important to us, but so is our heritage. For over seven decades John Pass Jewellers has been going from strength to strength. We've put ourselves on the map for stocking some of the world's most prestigious watch brands in our stores located in the North Staffordshire and South Cheshire area.

It all started 70 years ago when John Pass Senior founded the company. His vision to explore his passion for antique clocks and watches paved the way for what would become the go-to place to get your beloved timepiece fixed or serviced. Fast-forward a few more years and John Pass Senior and his wife began forging their way to success, stocking a range of innovative jewellery designs and refining that all-important personalised shopping experience for each customer. It was, however, up to John Pass Junior to continue nurturing the trusting relationships that his father had worked so hard to develop with devoted customers when he came to take over the business some years later.
